

P01	General
P1.1	Diederichs R.: Internet Communication Services for the NDT Sector
P1.2	Migoun N.: New peculiarities of penetrant testing with non-continuous developer layer
P1.3	Osterloh K.: EFNDT Working Group 5 „NDT Technology for Public Security and Safety”, two areas with the same aim
P1.4	Posypaiko Y.: Development of Optoelectronic Sensory Leak Detector
P1.5	Espinosa J.: Non-invasive Subpixel Method for Frequency Measurements Based on Image
P1.6	Hasníková H.: New Devices for Diagnostics of Historical Structures
P02	Modeling and Simulations
P2.1	Sofienko A.: Electron range evaluation and X-ray conversion optimization in tungsten transmission-type targets with the aid of wide electron beam Monte Carlo simulations
P2.2	Desjardins D.: Simultaneous evaluation of material parameters using analytical transient eddy current models
P2.3	Yamasaki M.: Non-destructive estimation of Young's modulus for lumbars in air dry condition from the stress wave measurement at green condition
P2.4	Golub M.: Spring Boundary Conditions for Nonperfect Contact Simulation in Multilayered Composites in Three-Dimensional Case
P2.5	Tleukenov S.: Analytical solutions of Bleustein–Gulyaev modes in high anisotropic piezoelectrics
P2.6	Candelas P.: Ultrasound transmission bands through perforated plates with two periodic arrays of subwavelength apertures
P2.7	Candelas P.: Ultrasonic lens based on a subwavelength slit surrounded with grooves in curved depths distribution
P2.8	Aleksić V.: Use SolidWorks in the Non Destructive Testing of Pressure Vessels
P2.9	Petercakova A.: Non Destructive Determination of Mechanical Properties
P2.10	Dos Santos S.: New damage detection and localization strategy from numerical library
P03	Ultrasonic Testing
P3.1	Chen J.: A Nonlinear Acoustic Method to Image the Quantitative Adhesion at the Bonded Solid-Solid Interface
P3.2	Tleukenov S.: Lamb type waves in piezomagnetics media
P3.3	Santos J.: Air-coupled ultrasonic C-scan effectiveness for impact damage evaluation in CFRP laminates
P3.4	Mirchev Y.: Modification of Rayleigh reflection from a bottom uneven surface
P3.5	Pabel T.: Non-destructive determination of the primary silicon particle size in hypereutectic aluminium-silicon cast alloys by ultrasound
P3.6	Yucel M.: Identification and Utilisation of Ultrasonic Guided Waves for Inspection of ACSR Cables
P3.7	Muravieva O.: Peculiarities of Acoustic Testing Techniques on the Multiple Reflections for Extended Objects
P3.8	Muraviev V.: The Ultrasonic Testing of Rail Wheel Residual Stress by Acoustic Elasticity Technique
P3.9	Santos M.: Thermophysical properties of ionic liquid systems by ultrasound speed
P3.10	Dergachev A.: Improvement of reliability of ultrasonic testing of welds
P3.11	Jiménez A.: Comparative Study of Different Methods to Assess Ultrasonic Velocities of Waves in a Liquid Medium
P3.12	Kinzhagulov I.: Application laser ultrasound defectoscopy for control of solder joints of thin-walled products
P3.13	Kravchenko A.: Delopment of Ultrasonic Equipment and Method of Definition of Concentration of a Solid Phase Hexahydrate of Nitrate Uuranyl in a Crystallizer
P3.14	Bychenok V.: Application of laser ultrasound method for control of residual stresses in products and from special materials
P3.15	Hagglund F.: Development and validation of an automated ultrasonic system for the non-destructive evaluation of welded joints in thermoplastic storage tanks

P3.16	Sergeichev I.: Application of laser ultrasonic measurement to verification of ply-by-ply damage modelling of composite laminates subjected to low velocity impact
P3.17	Benammar A.: Signal Processing for Ultrasonic Phased Array of Multi-layered Composites Based on Deconvolution technique
P3.18	Lyanzberg D.: Ultrasonic testing of ITER in-vessel components
P3.19	Heckel T.: Wheel Set Axle Inspection Using Advanced Phased Array Approach
P3.20	Benammar A.: Ultrasonic phased array detection of cracking in pipe using signal processing
P3.21	Sugawara A.: Closed-crack imaging and the analysis of nonlinear scattering behavior using confocal subharmonic phased array and damped double node model
P3.22	Park C.: Image enhancement of phased array based on cross-spectral beamforming by using spatial frequency filter
P3.23	Nikitina N.: Ultrasonic NDT of the material of working blades of high pressure turbo compressor
P3.24	Hillger W.: Scanning systems for Ultrasonic imaging Systems
P3.25	Karabutov A.: Laser ultrasonic investigation of laminate disbonding
P3.26	Farias C.: influence of deleterious phases in super duplex steel SAF 2507 in the ultrasonic Lamb waves propagation
P3.27	Santos Y.: Ultrasonic Nondestructive Evaluation of Isothermal Aging in HP Steels
P3.28	Walaszek H.: Triple Non destructive imaging of mechanically impact-damaged composite plates
P3.29	Suchkov A.: A New Rail Ultrasonic Inspection Method
P3.30	Schubert F.: Piezoelectric properties of CVD deposited AlN layers as active material for ultrasonic transducers
P3.31	Wolf M.: Advanced signal analysis for the examination of multilayered structures using ultrasound annular arrays
P3.32	Voronkova L.: Computer simulation of acoustic fields of normal and angle probes with phased array.
P3.33	Poirier J.: An Efficient Implementation of PAUT & TOFD for Weld Inspection
P04	Acoustic Emission
P4.1	Kostin V.: Definition of Magnetostrictive Sensitivity and Structural-phase State of Heat-treated Fe Alloys by Using MAE Measurements
P4.2	Korenska M.: Experimental Study of the Potential Usage of Acoustic Emission to Railway Track Faults Detection
P4.3	Grum J.: Acoustic Emission Crack Detection at Injection Molding Process
P4.4	Timčaková-Šamárková K.: Inspection Condition of Reinforced Concrete Structures Using Acoustic Method of Non-Destructive Testing
P4.5	Bohac P.: Acoustic Emission Generated during Scratch Test of Various Thin Film – Substrate Systems
P4.6	Pazdera L.: Advanced Analysis of Acoustic Emission Parameters during the Concrete Hardening for Long Time
P4.7	Stefkova D.: High-temperature degradation confirmed by Impact-echo Method tested on Cementations Composite Materials Containing Rubber Aggregates and Acrylic or Ethylene Vinyl Acetate Polymer Binder
P4.8	Carbol L.: Measurement of Material Properties Using Deterministic White Noise
P4.9	Vlašić F.: Assessment of Early Fatigue of Power Plant Material Using Acoustic Emission Method
P4.10	Prokhorenko S.: Thermal Excitation System with Heat-Transfer Agent Energy Flow Controlled Parameters for the Evaluation of Material Defects
P4.11	Jimenez Garrido J.: Development and evaluation of an integrated structural health monitoring system for the tidal energy
P05	Infrared Testing
P5.1	Larioshina I.: Evaluating Building Envelope Thermal Resistance by Using Infrared Thermography
P5.2	Kim W.: Infrared thermographic NDT for the Fault Diagnosis of Bearing with Foreign Substances inside under Loading Condition
P5.3	Tomaka B.: System Concept for Patch Tests which Conforms to Requirements for Medical Thermography

P06 Eddy Current Testing	
P6.1	Opanasenko A.: New portable eddy current flaw detector and application examples
P6.2	Rudlin J.: Inspection of Laser Powder Deposited Layers
P6.3	Uchanin V.: Enhancement of the sensitivity to EC coil impedance variations based on phase measurements
P6.4	Lysenko I.: Pulsed Eddy Current Nondestructive Testing of the Coating Thickness
P6.5	Patrick C.: The Eddy current array applied to the defect detection on complex geometry
P6.6	Zagidulin T.: Automated eddy-current flaw detector-scanner for main steel pipelines inspection
P6.7	Paul J.: Microsystem Technology for Eddy Current Testing
P6.8	Lunin V.: Two Parameter Repair Criteria for Eddy Current Testing of Steam Generator Tubes
P6.9	Silva I.: Corrosion Inspection Using Pulsed Eddy Current
P6.10	Lunin V.: Evaluation of Conductive Deposits Volume Using Eddy Current Signal
P6.11	Yin W.: A FPGA Based Platform for Multi-Frequency Eddy Current Testing
P6.12	Zergoug M.: cementation and corrosion analysis by pulsed eddy current
P07 Magnetic Testing	
P7.1	Gorkunov E.: Estimation of Biaxial Strains by a Coercimetric Method
P7.2	Gorkunov E.: On the Reasons for the Non-Unique Behavior of Structure-Sensitive Magnetic Characteristics of Alloyed Carbon Steels under Tempering
P7.3	Gorkunov E.: An Investigation into the Effect of Elastic Deformation by Tension (Compression), Torsion and Hydrostatic Pressure on the Magnetic Characteristics of Pipe Steel
P7.4	Putilova E.: Application of magnetic NDT methods to evaluate the stress-strain state of the individual zones of welded joints
P7.5	Vasilenko O.: Magnetizing Device with a Predetermined Localization of Magnetic Flux
P7.6	Dubov A.: Application Experience of Non-Contact Magnetometric Diagnostics of Pipelines and Perspectives of its Development
P7.7	Roskosz M.: Identification of the stress-strain state of ferromagnetic steels based on the measurement of magnetic parameters
P7.8	Yao E.: Research on Metal Magnetic Memory Testing of Stress Concentration based on orthogonal lock-in-amplifier
P7.9	Sandomirsky S.: Structural and phase sensitivity of the relaxation magnetics parameters of steels
P7.10	Sandomirsky S.: Estimation of the Internal Demagnetizing Factor of Cast Iron
P7.11	Canova A.: Analysis of metallic ropes magnetisation during magneto-inductive testing
P7.12	Troitskiy V.: Movable Local Multidirectional Magnetization of Metal Structures at Magnetic Particle Testing
P7.13	Wang H.: Barkhausen Noise Application in RPV Irradiation Embrittlement Detection
P7.14	Wang H.: Excitation Waveform on the Research of the Effects of Barkhausen Noise Signal Detection
P7.15	Zambrano Otero M.: Magnetic flux leakage measurement system to detect flaws in small diameter metallic wire ropes
P7.16	Skrbek B.: Combined nondestructive structuroscopy of dispersion metallic materials
P7.17	Canova A.: The wavelet analysis: application to the magneto-inductive testing
P7.18	Witos M.: Examination of technical gear with the help of magnetic passive observer status
P7.19	Matula R.: Diagnostics of Bridge Pavements by Ground Penetrating Radar
P7.20	Štarman S.: Advances in Defect Detection and Characterization using Magnetic Particle Inspection

P08	Radiography and Computed Tomography
P8.1	Gatjal M.: Quality Analysis of Helically Welded Tube Joints
P8.2	Shteyn A.: Application of pulse-frequency X-ray machine for implementation of dual energy mode
P8.3	Udod V.: Energy spectrum modification of bremsstrahlung X-ray intensity
P8.4	Wrobel N.: Innovative X-ray Backscatter Technique for Security Applications: Detection of Dangerous Materials
P8.5	Troitskiy V.: Flash-Radiography Instead of Traditional Radiography with Intermediate Carriers of Information
P8.6	Porsch F.: An automated CT scanner system for quality control
P8.7	Schielein R.: Quantitative evaluation of CT Images by means of Shannon Entropy
P8.8	Schehr K.: Multi-Nuclide Sources for Improved Radiographic Performance
P8.9	Yankova I.: Determination of ductile to brittle transition temperature on reconstructed specimens of reactor pressure steel
P8.10	Nicoleta V.: Non-destructive applications for cultural heritage
P8.11	Birir J.: Welding Quality in Kenya: Application of Radiography
P09	Industrial Applications and Material Testing
P9.1	Gorzelańczyk T.: Non-destructive testing of moisture in cellulose fiber-cement boards
P9.2	Gorzelańczyk T.: Studies of influence of moisture content in cellulose fiber-cement boards on wave parameters using non-contact ultrasound
P9.3	Chuprin V.: Ultrasonic Measurements of Kinematic Viscosity for Analize of Engine Oil Parameters
P9.4	Pfleger M.: Strain-Dependent Birefringence Of Elastic Polymers
P9.5	Wang Y.: Research on the Leak Testing Technique of Flexible Accumulation Chamber
P9.6	Roskosz M.: Testing the impact of creep on the X12CrWMoVNbN10-1-1 steel magnetic properties
P9.7	Simonova V.: Opto-acoustic and laser-ultrasonic tomography system for composites testing
P9.8	Koltsov V.: Modern Mobile Systems for Diagnostics of Power Supply Facilities
P9.9	Ivanova Y.: Stress state evaluation of railway wheels
P9.10	Manychova M.: Assessment of Damage in Reinforced Concrete Girder by Using Nonlinear Ultrasonic Spectroscopy
P9.11	Pohl J.: On site stress measurement in steel pipes
P9.12	Troitskiy V.: Main Developments of the E.O. Paton Electric Welding Institute in the Field of Non-Destructive Testing
P9.13	Kren A.: Determination of the residual stresses by the dynamic indentation method
P9.14	Okhorzina A.: Methods and devices for noncontact express measurement of the main electro-physical parameters of polysilicon and polysilicon used for solar cells production
P9.15	Tabakova B.: Material degradation of pipelines
P9.16	Dvorak M.: The Use of Embedded FBG Sensors for Monitoring of the Composite Wing Structure
P9.17	Sofiienko A.: Evaluation of monocrystalline ZnSe as a high-temperature radiation detector
P9.18	Bhalla V.: Ultrasonic wave propagation in Erbium monopnictides
P9.19	Miljković D.: Aircraft Piston Engine Fault Detection Based on Uniformity of Cylinder Head, Exhaust Gas and Turbochargers Temperatures
P9.20	Zhou K.: A Research of Wind Turbine Blade Delamination Detection Technology Based on the Acoustic Impact
P9.21	Filinov M.: The Role Of Nondestructive Microscopic Metallography (NDMM) In The Estimation Of The Residual Resource

P9.22	Štarman S.: Application of Ultrasonic Techniques Used for Axle Testing
P10	NDT in Civil Engineering and Concrete Structures
P10.1	Gabrijel I.: Acousto-ultrasonic assessment of concrete properties after exposure to high temperatures
P10.2	Sasaki Y.: Non-destructive stress evaluation of wood members in Japanese traditional building
P10.3	Serelis E.: Non-destructive test methods applicability on structure analysis of ultra-high performance concrete after cyclic freeze damage deterioration
P10.4	Kusák I.: Thermal Stress of Building Materials Containing Rubber Granulate and Polymer Binder Characterised by Alternating Electric Field
P10.5	Franck-Neel C.: Use of portable X-Ray fluorescence signal for characterization of soil physical parameters : A feasibility study
P10.6	Abdelhalim B.: Investigation On The Concrete's Segregation By Ultrasonic Pulse Velocity
P10.7	Batov G.: Thermal Testing of Cellular Towers Constructed from Tubular Rods.
P10.8	Grigaliunas P.: SCC flow induded fiber distribution and orientation. Non-destructive inductive method
